- ❖ *Scientific feedback for the NWM was due by COB July 14, and the briefing to the NCEP Director is scheduled for July 29. IT stability issues forced a restart of the IT stability 30-day period. That ends August 5 and implementation is planned for August 16.
- ❖ The GFS-MOS, EKDMOS, and NBM are on schedule to be starting their 30-day evaluations in the next few weeks. Early GFS-MOS output may be viewed at <http://para.nomads.ncep.noaa.gov/pub/data/nccf/noaaport/gfsmos>

C. Proposed upcoming NCO RFC(s) with potential Enterprise effect:

- ❖ Make grib index files for the HWRF available, to allow more efficient access to grib files. The HWRF grib files increased in size with the recent upgrade (due to resolution increase), so this will allow users to more easily access just the variables they need from the grib files. To be implemented on July 26 at 1330Z.
